

I want to offer my comment regarding the issue of low power FM service and translator FM services. Specifically, I want to talk about a service that my family and I love. K LOVE radio is a national broadcast service using the FM translator service. This station is part of my family's daily life. We love it and believe it is a positive influence in our community. We do not have to worry about abusive language while we listen to the radio. K Love is one station that we know we can trust. It is a nonprofit organization supported through listener contributions. Its centralized broadcast allow it to make the most of our donations. In essence I fill that it is an essential part of our community. Allowing this new low power service to have priority over its signal would be a disservice not only to Cincinnati but to each community that has access to such a wonderful station. Please consider this when you make your decision regarding this issue.

Thank you for your help,

Cynthia Lampkin
